PERSON MASTER
Release notes

MAGENTA^{aps}

TABLE OF CONTENTS

INTRODUCTION

This document lists all the versions of Person Master starting with version 2.0.

1VERSION 2.0

– Release data: 6 Nov 2012

– The main change in this version is the introduction of a new method GetCPRsFromObjectIDArray() that allows the caller to map an array of UUID's to their corresponding CPR numbers.

– Another minor change is a configuration element that allows multiple host header values to be specified.

2VERSION 2.1.0

- – Release date : 25 Apr 2013

- – Allows ASP.NET Compatibility to let system administrators use standard ASP.NET authorization methods and allow/deny access to certain user or groups

- – Default config file for new installations is easier to configure SSL and/or access control

3VERSION 2.1.1

– Release date: 10April 2014

3.1Installer

– Exceptions are shown as message boxes

– IIS 8 is now accepted

– Correct detection of user account control Windows 2012
